ABOUT US

BioRes Dentech Inc. / About Us

Leveraging Academic Excellence, Reinventing Smiles

BioRes Dentech Inc.

BioRes is a dental technology company headquartered in Walnut, California, USA. Founded by a group of internationally renowned oral implant experts, the company boasts an advanced research and development laboratory, a top-tier technical team, and a global collaborative network. As an innovative leader in the global dental field, BioRes Dentech Inc. focuses on technological breakthroughs and standard-setting within the implant industry. The company is committed to providing academic support for global oral health and infusing life with health and smiles.

BRAND CONCEPT

BioRes Dentech Inc. / Brand Concept

OUR VISION

**Combining global research wisdom
to drive innovation in dental implants.**

OUR MISSION

**To safeguard oral health
and reshape the ideal life.**

OUR VALUE

**Respect, integrity, professionalism,
and positivity.**

EXPERIMENTAL AND APPLICATION PARTNERS

BioRes has established an in-depth collaboration with Sichuan University West China School of Stomatology in the field of clinical research.

Partnership

Leveraging the clinical expertise and academic influence of West China School of Stomatology, combined with BioRes' technological strengths in innovative implant solutions, the collaboration conducts systematic trials and long-term follow-ups to comprehensively validate the safety and efficacy of dental implant products, while providing scientific support for product optimization and industry standard advancement.

for Dentistry

10th

Sichuan University West China School of Stomatology was established in 1907 and is recognized as the birthplace of modern dentistry in China, often referred to as the "Cradle of Chinese Dentistry." As the first specialized dental hospital in China and one of the first tertiary level A dental hospitals, it bears significant responsibilities for the National Clinical Research Center for Oral Diseases and the National Clinical Research Center for Oral Medicine.

The hospital has eight national key clinical specialties, achieving full coverage of major clinical departments with national clinical key specialties. It serves not only as a national standardized training base for residents but also as a core force for the diagnosis, treatment, and research of oral diseases in Western China.

MANUFACTURING AND PRODUCTION PARTNERS

BioRes premium products are precision-manufactured by Besmile

Partnership

BioRes has established a strategic partnership with Besmile Medical Technology, capitalizing on Besmile's advanced implant manufacturing expertise to enhance the production quality and international market expansion of the BIORES product portfolio.

To date, the collaboration has consistently delivered premium dental solutions, enabling broader patient access to world-leading technologies.

Digital Full-Process Solution Provider in Dental Restoration and Implantation

Founded in 2013, Chengdu Besmile Medical Technology Co., Ltd. is a high-tech enterprise dedicated to the R&D, production, and sales of dental implants and digital dental equipment. Headquartered in Chengdu, China—the company operates from a 50,000-square-meter facility and has subsidiaries in the U.S. and Europe.

Since its inception, Besmile has remained committed to independent innovation, offering multi-dimensional support—from product solutions and technical training to customer service and dental education—all tailored to customer needs. To date, the company has obtained NMPA (China), CE (EU), and FDA (U.S.) certifications, along with over 100 global patents,

and serves 100+ countries and regions worldwide. Its smart manufacturing platform powers two key offerings:

- **BSM Labside Solution** - Empowers dental labs' digital transformation
- **BSM Chairside Solution** - Enhances treatment quality and clinic efficiency

Guided by the mission "Technology for Beautiful Smiles, China's Brand for the World," Besmile continues to expand its global partnerships in pursuit of becoming a leading international provider of digital dentistry solutions.

IMPLANT SYSTEM

BioRes Dentech Inc. / Product Portfolio

Brilliant and Resilient

Turn discomfort into ease — ensuring a safe, seamless experience with our trusted expertise.

Professional Drive, Precision and Reliability

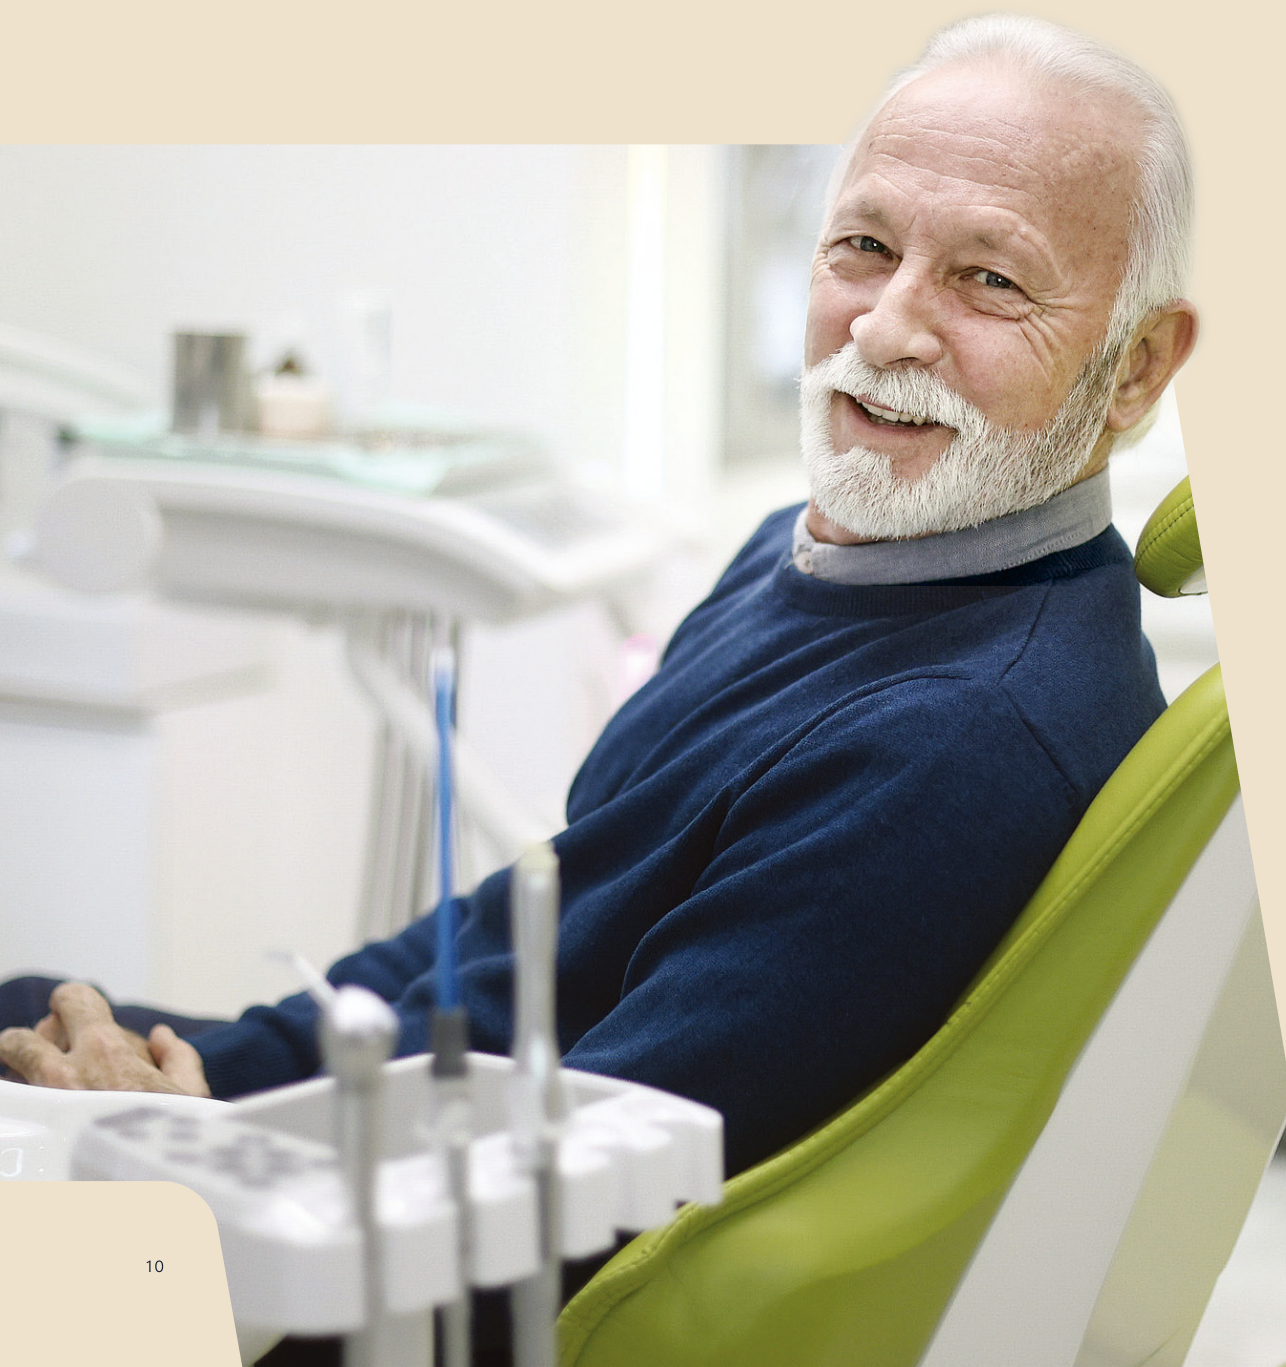

Inheriting the philosophy of BIORES, RuiZhi meticulously carves out its design, materials and manufacturing processes, and repeatedly verifies experiments. In every link of R&D, production, and inspection, it presents with outstanding performance with stricter requirements than international standards.

Warm Protection, Trust in Health

RuiZhi is user-centered, focusing on their real needs and scenarios. From efficient support during surgery and operation to comfortable healing and natural stability in daily use, RuiZhi is not only a bridge to health and confidence but also a long-term companion in life.

Continuous Breakthrough, Future Worth Entrusting

RuiZhi will continue to lead innovation. Always based on professional technology and warm protection, it will provide higher-quality products and services through continuous improvement, making every choice trustworthy. Planting with Intention, Planting with Confidence.

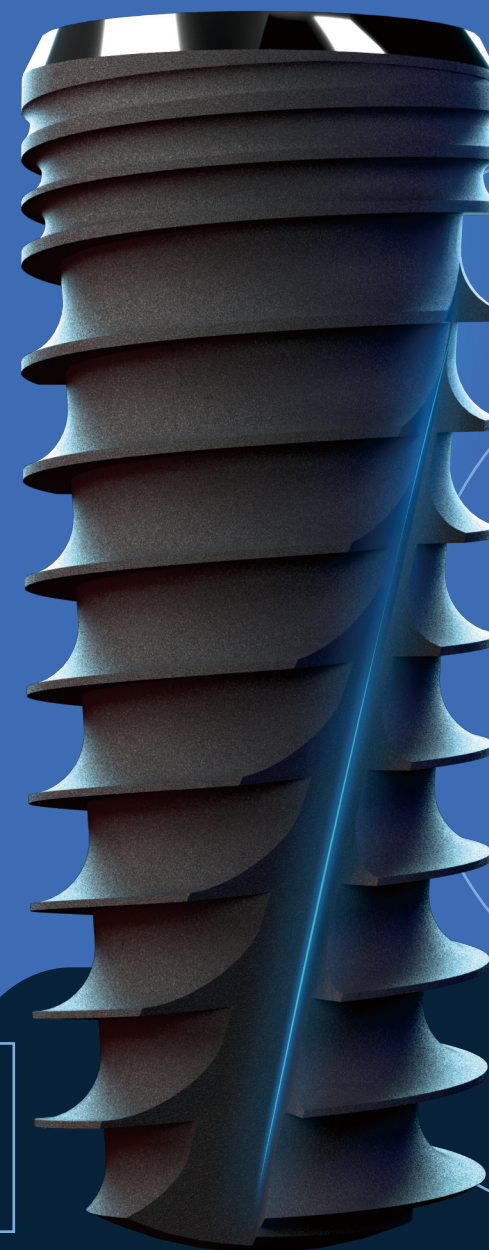

BioRes

Ruizhi Implant System

BioRes Dentech Inc. / Flagship Product

Equisite Expertise

Superior Bone Preservation

0.5mm smooth collar, promotes alveolar bone retention

Self-Tapping, Easy Implantation

Excellent initial stability with simplified procedures for safer, more efficient implantation.

High Strength Support

Premium Grade 4 cold-worked pure titanium for exceptional strength and fatigue resistance.

Active Integration

SLA surface technology for optimal bone bonding.

Proven Stability

The five-year success rate of implants is 99.05% backed by top dental institutions.

Clean & Safe

Advanced water purification process for zero residue and enhanced osseointegration.
